

Video Demo Report

Authors/Developers:

- Troy Thomas thomast9@myumanitoba.ca
- Phuc Hoang (umlearn display Phuc Phuc), phuch@myumanitoba.ca
- Isham Singh Behl - behli@myumanitoba.ca (maybe)

Fully/Mostly implemented:

- Player Character
- Enemy/Monster Characters
- Menus/Game Navigation
- Spells and Spell Slots
- Combat System

Partially implemented:

- Weapon/Item System
- Passive Abilities
- Simple Map
- Experience / Level System

Not yet implemented:

- Score Tracking
- Passive Ability Slots
- NPCs
- Town
- Dungeon Rooms
- Additional Enemies
- Unlockable Town Areas
- Gold/Money System
- Polish
- Multiplayer

We're a little behind on progress. Most of the main/core mechanics are implemented but still need some tweaking. We don't have any real levels yet (just our test level), since the group member who was supposed to be working on levels (and some other parts) hasn't contributed any work to the game yet. To get back on track, we are going to drop the multiplayer feature, and some other features might not get fleshed out to the extent we initially wanted. We may have to cut back on the number of enemies, levels, etc. from our initial plan. We may also need to help the group member who hasn't contributed yet or take over some parts from them. If we do this, we should still finish the game in time.
